Source: Data on labour productivity index for construction industry for 1997-2001 are from Statistics Canada Productivity Measures CANSIM II: Table 383-0013; the construction industry as a whole for 1997-2006 is from Table 383-0012; 1961-1997 from Sharpe, Andrew Productivity Trends in the Construction Sector in Canada: A Case of Lagging Technical Progress, International Productivity Monitor, fall 2001, P.68; Data on labour productivity for the business sector from Statistics Canada Productivity Measures Table 383-0008 for the year 1981-2006 and linked to Table 383-0005 for the previous years.

Note: Data on Construction labour productivity index for 1961-1997 are rebased to year 1997 since original data based on 1992; data for construction sub-industries labour productivity are combined with series from Sharpe's paper (1961-1997) and CANSIM table 383-0013 (1997-2001) when the definition of components are the same.

Table 8a: Labour Productivity levels in Canada, GDP per hour, Construction, 1961-2006 (1997=100).

YEARS	Construction	Construction Sub-Industries										Business sector
	Labour productivity	Residential construction	Non-residential building construction	Engineering and other construction activities	Repair construction	Transportation engineering construction	Oil and gas engineering construction	Electric power engineering construction	Communication engineering construction	Other engineering construction	Other construction activities	Labour Productivity

Source: Column A, B, and C from BEA NIPA Table 6.4 and 6.8 by extrapolated 1998 data back with growth rate of construction employment; column E from BEA NIPA Table 6.9 by extrapolated 2000 data back with growth rate of construction working hours.

Note: There are no series on self-employed persons based on NAICS, although there is a one based on SIC for 1961-2000. Therefore, the estimates of the total number of jobs are calculated by Column A + B - C, since BEA defines persons engaged in production as full time equivalent plus self-employed persons. In BEA Table 6.4, 6.5 and 6.8, estimates for 1961-1998 are based on SIC, and estimates for 1998-2005 based on NAICS; in BEA Table 6.9 2000-2005 based on NAICS and prior year based on SIC.

	Average annual growth rate									
1979-2003	4.05	3.24	2.74	3.46	4.83	5.19	4.63	2.79	12.65	6.07
1987-2003	2.44	2.48	2.12	2.56	4.01	3.55	2.63	2.68	10.18	3.79

Note: Average annual growth rates for countries without data available for 2003, such as Japan, Korea and Norway, are calculated for the period 1979-2002 and 1987-2002.

Construction sector is defined according to the International Standard Industrial Classification (ISIC-rev.3.) category 45.
