

Appendix Tables

Canada

- Appendix Table 1: Real Wages and Productivity, Canada, total economy, 1961-2007
- Appendix Table 2: Alternative Measures of Wages, Canada, total economy, current dollars per hour worked, 1961-2007
- Appendix Table 3: Exhaustive Measures of Wages, Canada, total economy, 1961-2007
- Appendix Table 4: Labour Income, Canada, millions of dollars, 1961-2007
- Appendix Table 5: Supplementary Labour Income, Canada, total economy, 1961-2005
- Appendix Table 6: Consumer Price Index, Canada, by component, index 2002 = 100, 1961-2007
- Appendix Table 7: Major Components of Labour's Terms of Trade, Canada, 1961-2007
- Appendix Table 8: GDP per capita and Labour Productivity in Canada, 1961-2007

Canadian Provinces

- Appendix Table 9: Real Wages and Productivity, Newfoundland and Labrador, Total Economy, 1997-2007
- Appendix Table 10: Real Wages and Productivity, Prince Edward Island, Total Economy, 1997-2007
- Appendix Table 11: Real Wages and Productivity, Nova Scotia, Total Economy, 1997-2007
- Appendix Table 12: Real Wages and Productivity, New Brunswick, Total Economy, 1997-2007
- Appendix Table 13: Real Wages and Productivity, Québec, Total Economy, 1997-2007
- Appendix Table 14: Real Wages and Productivity, Ontario, Total Economy, 1997-2007
- Appendix Table 15: Real Wages and Productivity, Manitoba, Total Economy, 1997-2007
- Appendix Table 16: Real Wages and Productivity, Saskatchewan, Total Economy, 1997-2007
- Appendix Table 17: Real Wages and Productivity, Alberta, Total Economy, 1997-2007
- Appendix Table 18: Real Wages and Productivity, British Columbia, Total Economy, 1997-2007
- Appendix Table 19: Real Wages and Productivity, Yukon, Total Economy, 1997-2007
- Appendix Table 20: Real Wages and Productivity, Northwest Territories, Total Economy, 1997-2007
- Appendix Table 21: Real Wages and Productivity, Nunavut, Total Economy, 1997-2007

Canada - Industries

- Appendix Table 23: Real GDP, Canada, by Sector, Total Economy, Millions of Chained 2002 Dollars, 1981-2007
- Appendix Table 24: Nominal GDP, Canada, by Sector, Total Economy, Millions of Current Dollars, 1981-2007
- Appendix Table 25: Labour Compensation, Canada, by Sector, Total Economy, Millions of Current Dollars, 1981-2007
- Appendix Table 26: Hours Worked, Canada, by Sector, Total Economy, Millions of Hours, 1981-2007
- Appendix Table 27: Labour Compensation, Canada, by Sector, Total Economy, Millions of Current Dollars, 1981-2007
- Appendix Table 28: Labour productivity, Canada, by industry, total economy, 1997-2004
- Appendix Table 29: Total Compensation per hour worked, deflated by GDP deflator, Canada, by industry, total economy, 1997-2004
- Appendix Table 30: Labour share, Canada, by industry, total economy, per cent, 1997-2004
- Appendix Table 31: GDP deflator, Canada, by industry, 1997-2006

United States

- Appendix Table 32: Labour Productivity and Real Wages, United States, 1960-2007
- Appendix Table 33: Price Indices, United States, 1961-2007

OECD Countries

- Appendix Table 34: Labour Productivity, OECD Countries, GDP per hour worked, 2000 prices in national current prices, 1970-2007
- Appendix Table 35: Real Compensation of Employees per hour worked, select OECD countries, GDP deflated by GDP deflator, 1970-2007
- Appendix Table 36: Total worker compensation as a share of GDP, Select OECD countries, per cent, 1970-2007

Appendix Table 37: Labour's Terms of Trade, GDP deflator divided by CPI, index 2000 = 100, 1970-2006

Appendix Table 38: Real Compensation of Employees per hour worked, select OECD countries, national

Appendix Table 40: Nominal compensation of employees per hour worked, select OECD countries, current

Appendix Table 41: Gross domestic product (expenditure approach), OECD countries, millions of current

Appendix Table 42: Gross domestic product (expenditure approach), OECD countries, million of national

Appendix Table 43: Implicit Price Index for GDP (expenditure approach), OECD countries, index 2000=100, 1970-2006

Appendix Table 44: Consumer prices - all items, OECD countries, index 2000=100, 1970-2006

Appendix Table 45: Real compensation of employees per hour worked, select OECD countries, CPI deflated

Appendix Table 46: Hours worked for total employment, OECD countries, millions of hours worked 1970-2006

Other Tables

Appendix Table 47: Unionization Rate, Proportion of Employees with Union Coverage, Canada, 1976-1995 and

Appendix Table 48: Gini Coefficient for Market Income, by household type, 1976-2006

Sources and Notes:

[1] Series is a composite prepared by the author from CANSIM Series v716818 "Canada; Hours worked for all jobs (Hours); Total economy, special aggregation" (1961-2001) from "Table 383-0003 - Labour productivity and related variables, by industry according to the Canadian System of National Accounts, annually" and v15900411 "Canada; Total economy; Hours worked for all jobs (Hours); All industries" (1997 to 2006) from "Table 383-0010 - Labour statistics consistent with the System of National Accounts, by North American Industry Classification System (NAICS), annually." The series was constructed by assuming that the series v15900411 increased at the same rate as series v716818 starting in 1961. During the period over which both series are available (1997-2001), v716818 increased at a compound annual rate of 1.95 per cent and series v15900411 increased at a compound annual rate of 1.97 per cent.

From Statistics Canada footnote to Table 383-0010 and 383-0003: Hours worked for all jobs (Hours)

The number of hours worked in all jobs is the annual average for all jobs times the annual average hours worked in all jobs. According to the retained definition, hours worked means the total number of hours that a person spends working, whether paid or not. In general, this includes regular and overtime hours, breaks, travel time, training in the workplace and time lost in brief work stoppages where workers remain at their posts. On the other hand, time lost due to strikes, lockouts, annual vacation, public holidays, sick leave, maternity leave or leave for personal needs are not included in total hours worked.

[2] Series is a composite prepared by the author from CANSIM Series v717040 "Canada; Total compensation for all jobs (Dollars); Total economy, special aggregation" (1961-2001) from "Table 383-0003 - Labour productivity and related variables, by industry according to the Canadian System of National Accounts, annually" and v15900543 "Canada; Total economy; Total compensation for all jobs (Dollars); All industries" (1997 to 2006) from "Table 383-0010 - Labour statistics consistent with the System of National Accounts, by North American Industry Classification System (NAICS), annually." The series was constructed by assuming that the series v15900543 increased at the same rate as series v717040 from 1961 to 1997. During the period over which both series are available (1997-2001), v717040 increased at a compound annual rate of 5.76 per cent and series v15900543 increased at a compound annual rate of 5.82 per cent.

From Statistics Canada footnote to Table 383-0010 and 383-0003: Total compensation for all jobs (Dollars)

The total compensation for all jobs consists of all payments in cash or in kind made by domestic producers to workers for services rendered - in other words, total payroll. It includes the salaries and supplementary labour income of paid workers, plus an imputed labour income for self-employed workers. Data for this output are available up to the most current year of the Input-Output table.

Notes:

[5] Beginning January 1997, information is collected on the usual wages or salary of employees at their main job. Respondents are asked to report their wage/salary before taxes and other deductions, and include tips, commissions and bonuses. Weekly and hourly wages/salary are calculated in conjunction with usual paid work hours per week.

[1] Statistics Canada CANSIM Table 380-0016 - Gross Domestic Product (GDP), income-based, annually (Dollars)

[2] Series is a composite prepared by the author from CANSIM Series v717040 "Canada; Total compensation for all jobs (Dollars); Total economy, special aggregation" (1961-2001) from "Table 383-0003 - Labour productivity and related variables, by industry according to the Canadian System of National Accounts, annually" and v15900543 "Canada; Total economy; Total compensation for all jobs (Dollars); All industries" (1997 to 2006) from "Table 383-0010 - Labour statistics consistent with the System of National Accounts, by North American Industry Classification System (NAICS), annually." The series was constructed by assuming that the series v15900543 increased at the same rate as series v717040 from 1961 to 1997. During the period over which both series are available (1997-2001), v717040 increased at a compound annual rate of 5.76 per cent and series v15900543 increased at a compound annual rate of 5.82 per cent.

From Statistics Canada footnote to Table 383-0010 and 383-0003: Total compensation for all jobs (Dollars)

The total compensation for all jobs consists of all payments in cash or in kind made by domestic producers to workers for services rendered - in other words, total payroll. It includes the salaries and supplementary labour income of paid workers, plus an imputed labour income for self-employed workers. Data for this output are available up to the most current year of the Input-Output table.

Appendix Table 4: Labour Income, Canada, millions of dollars, 1961-2007

Notes:

A retiring allowance (or severance pay) is an amount paid to officers or employees at the time, or after, they retire from an office or employment in recognition of long service, or for the loss of office or employment. Retiring allowances include payments for unused sick leave credits and amounts received for termination of employment, but exclude superannuation or pension benefits, amounts received as a result of an employee's death, or benefits derived from certain counselling services.

[1] Table 1c. Real GDP at market prices. Statistics Canada: 1901 - National Income and Expenditure Accounts: CANSIM Table 380-0017 - Gross Domestic Product (GDP), expenditure-based, annually (Dollars unless specified)

[2] Calculated from Statistics Canada 3601 - Estimates of Total Population, Canada, Provinces and Territories: CANSIM Table 510005 - Estimates of population, Canada, provinces and territories, quarterly (Persons). Mean of quarterly estimates calculated by CSLS to get

[4] Series is a composite prepared by the author from CANSIM Series v716374 "Canada; Total number of jobs (Jobs); Total economy, special aggregation *Terminated* (1961-2001)" from "Table 383-0003 - Labour productivity and related variables, by industry according to the Canadian System of National Accounts, annually" and V15856272 "Canada; Total economy; Total number of jobs (Jobs); All industries (1997-2007)" from "Table 383-0009 - Labour statistics consistent with the System of National Accounts, by job category and North American Industry Classification System (NAICS), annually ." The series was constructed by assuming that the series V15856272 increased at the same rate as series v716374 starting in 1961. During the period over which both series are available (1997-2001), v716374 increased at a compound annual rate of 2.11 per cent and series V15900147 increased at a compound annual rate of 2.05 per cent.

[5] Series is a composite prepared by the author from CANSIM Series v716818 "Canada; Hours worked for all jobs (Hours); Total economy, special aggregation" (1961-2001) from "Table 383-0003 - Labour productivity and related variables, by industry according to the Canadian System of National Accounts, annually" and v15900411 "Canada; Total economy; Hours worked for all jobs (Hours); All industries" (1997 to 2006) from "Table 383-0010 - Labour statistics consistent with the System of National Accounts, by North American Industry Classification System (NAICS), annually." The series was constructed by assuming that the series v15900411 increased at the same rate as series v716818 starting in 1961. During the period over which both series are available (1997-2001), v716818 increased at a compound annual rate of 1.95 per cent and series v15900411 increased at a compound annual rate of 1.97 per cent.

Appendix Table 9: Real Wages and Productivity, Newfoundland and Labrador, Total Economy, 1997-2007

Note: Total compensation for all jobs

Series for "All industries, total economy," and "Educational Services" were calculated by extending the series from table 383-009. into the past (from 1996) using growth rate from the series from Table 383-0003

Series for all other sectors from CANSIM Table 383-0009 extended back (from 1997) using growth rates from the corresponding series in CANSIM Table 383-0022.

x indicates that a series is not available

Source:

OECD: data extracted on 2008/04/28 16:39 from OECD.Stat

Date last updated by OECD: December 2007

Main data sources are: OECD Employment Outlook, OECD Labour Force Statistics, OECD Annual and Quarterly National Accounts and national sources.

Notes:

Labour productivity is defined as GDP per hour worked.

Underlying series of Gross Domestic Product refer to GDP in national currency, at constant prices, OECD base year 2000 for each country; and to GDP, in US dollars, at constant prices, constant PPPs, OECD base year 2000 for country groups / zones.

Labour input is defined as total hours worked of all persons employed. The data are derived as average hours worked (from the OECD Employment Outlook, OECD Annual National Accounts, OECD Labour Force Statistics and national sources) multiplied by the corresponding and consistent measure of employment for each particular country

Source:

data extracted on 2008/04/28 16:30 from OECD.Stat - no 2007 data as of 7Oct2008

Date last updated by OECD: December 2007

Main data sources are: OECD Employment Outlook, OECD Labour Force Statistics, OECD Annual and Quarterly National Accounts and national sources.

Note:

Underlying series of hours worked refer to hours worked per job for:

- Austria
- Canada
- Greece
- Japan
- United Kingdom
- United States
