International Productivity Monitor

The *International Productivity Monitor* (IPM) is an open-access, peer-reviewed economics journal published by the Centre for the Study of Living Standards in partnership with The Productivity Institute. The *IPM* publishes high-quality articles that build the evidence base and serve as a forum for global knowledge exchange on productivity research. Articles are contributed by leading academics and practitioners, combining rigorous analysis with practical insight, and are intended for a broad audience, including researchers, policy analysts, policymakers, the media, and the general public.
